OL0119 device introduction

- Please turn on the power to charge, OL0119 will be shown with a green light.
Device off / Device on /  Device on and Mute
- The light matches the color range will continue to display When powered by USB.
- Battery Powered Mode (Factory Setting)
The CO₂ concentration is within the range of the green light, the light is displayed every 60s.
The CO₂ concentration is within the range of the yellow light, the light is displayed every 30s.
The CO₂ concentration is within the range of the red light, the light is displayed every 15s.

Please choose on or  when charging.

Continuous green light shows when charging.

Require Bluetooth Permission

Please press the “OK” option.

(Bluetooth scan permission, only ask when opening the program for the first time)

If Bluetooth function is not enabled, a pop-up window will appear. Please press the “Settings” button, another pop-up window shows the [Bluetooth control page](#). (Pic. 3)

Please press "Allow New Connections"

Connect to OL0119

1. Swipe right on the selected OL0119 device. Then press the “Select” button to complete the selection action.
 2. Select one device[Setting] :
After pressing the “Select” button, the Change Device Name window will pop up. Then you will be taken to the login page.
 3. Select one device[Advertising] :
After pressing the “Select” button, the Change Device Name window will pop up. Then you will be taken to the setting page.
(*The advertising state can not set parameters for the device)
- ▲ The advertising state can not set parameters for the device.
- ▲ User can press  to rescan OL0119 device.

Change Device Name

After pressing "Select", you can do the following:

1. Click the "Cancel" button :
 - Use current device name
2. Click the "Enter" button :
 - If there is no text, the device name will revert to the device serial number.
 - If there are words, the device name will be replaced.

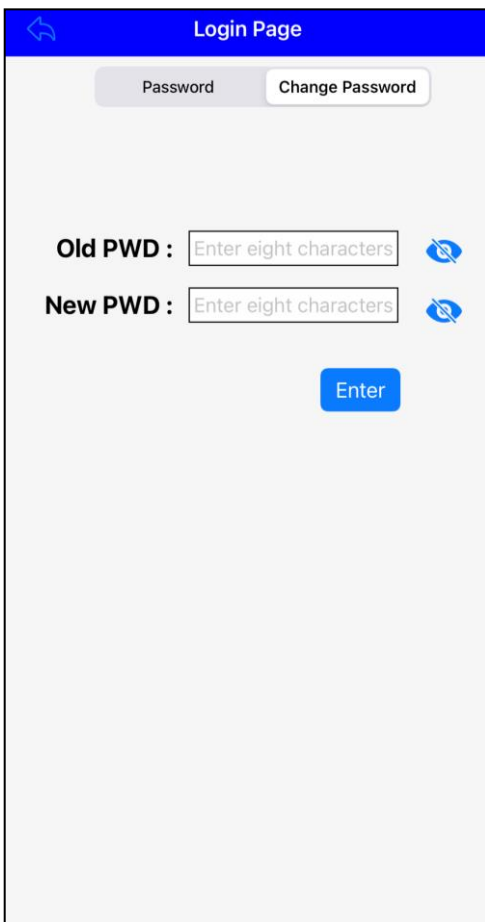

Login Password

The image displays two side-by-side screenshots of a 'Login Page' interface, connected by a blue arrow pointing from left to right. Both screenshots show a blue header bar with a back arrow and the text 'Login Page'. Below the header, there are two tabs: 'Password' (active) and 'Change Password'. The main content area has a 'Password:' label followed by a text input field and a blue eye icon. At the bottom, there is a blue 'Enter' button. In the left screenshot, the password field is empty, and the eye icon has a diagonal line through it. A red box highlights the text 'Hide – password invisible' below the eye icon. In the right screenshot, the password field contains '12345678', and the eye icon is solid blue. A red box highlights the text 'Show – password visible' below the eye icon. A blue arrow points from the 'Enter' button in the left screenshot to the 'Enter' button in the right screenshot.

Login Password :

1. User needs an eight-character password to connect to the OL0119.
(Default Password : 12345678)
2. Press “Enter” to connect OL0119 If the password is correct then you will be taken to the setting page.

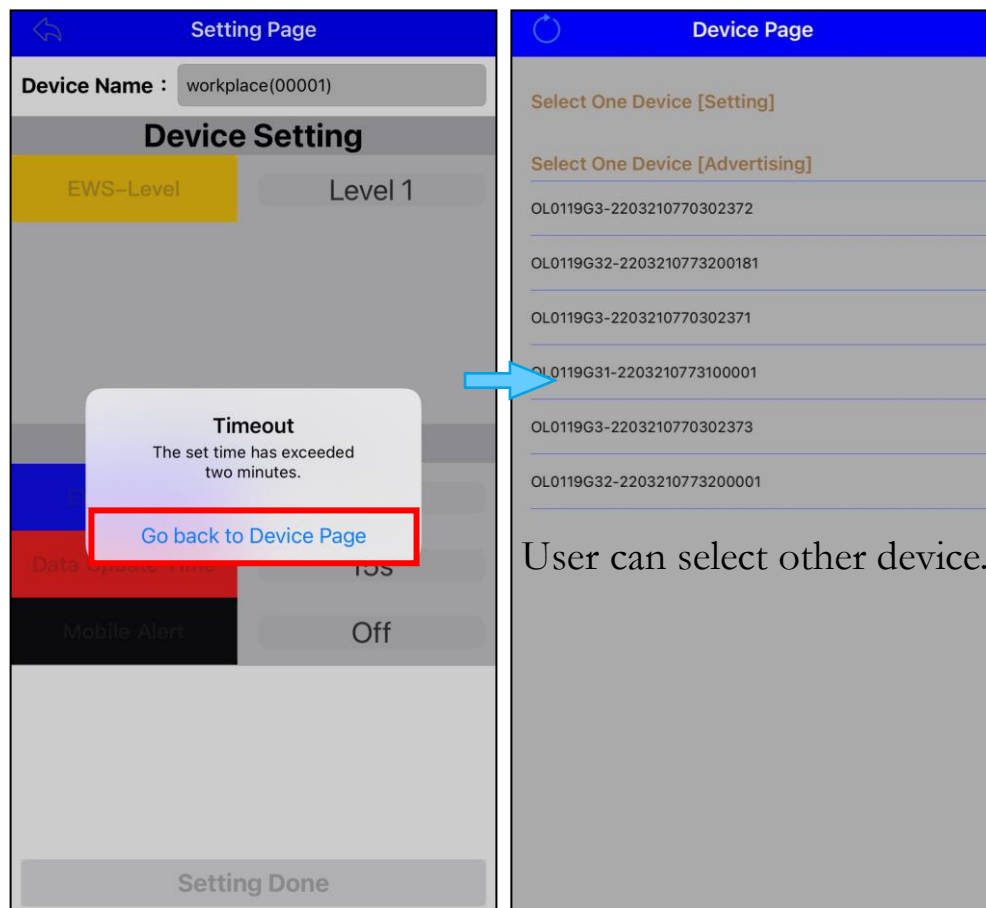

Change Password

The screenshot shows a web interface for changing a password. At the top, there is a blue header bar with a back arrow icon and the text "Login Page". Below the header, there are two tabs: "Password" (selected) and "Change Password". The "Change Password" tab is active, showing two input fields. The first field is labeled "Old PWD:" and contains the placeholder text "Enter eight characters". The second field is labeled "New PWD:" and also contains the placeholder text "Enter eight characters". Both input fields have a blue eye icon to the right, indicating a password toggle. Below the input fields, there is a blue button labeled "Enter".

1. Old password :
User needs enter the original password (Default Password : 12345678)
2. New password :
User needs to enter new eight character password.
3. Press “Enter” to connect OL0119
If the password is correct then user will be taken to the setting page.

Set Timeout

User has to complete the setting flow within two minutes.
If the time is exceeded, a pop-up timeout window will appear.

After Timeout windows appears, if user still wants to set the parameters of the device, please turn off the device and click  and start over.

User can select other device.

Set Parameter

風力級數	0
------	---

There are 5 grades to choose from in the pull-down of the wind power series

Beaufort scale	Name	Describe
0	Calm	Smoke rises vertically
1	Light air	Direction shown by smoke drift ; Still wind vanes
2	Light breeze	Leaves rustle ; Wind vanes begin to move
3	Gentle breeze	Light flags extended ; Leaves and small twigs constantly moving
4	Moderate breeze	Light flags constantly waving ; Dust, leaves, and loose paper lifted ; Small tree branches move
5	Fresh breeze	Light flags constantly waving with sound ; Ripples on inland waters ; Small trees in leaf begin to sway

Save Picture and Require Photos Permission

Click “Screen Capture” **Screen Capture** will pop-up this window.

Please press the “OK” button.
(Photos permission request, only ask when saving the screen capture for the first time)

Picture's Location : Photos -> Screen Shot

Device Parameters Modification

- When OL0119 is under BLE broadcasting mode, a power reset is required if any user would like to modify the parameters within the device.
- When switch device, click  on the Login or setting page, then one could scan OL0119 devices.

Troubleshooting

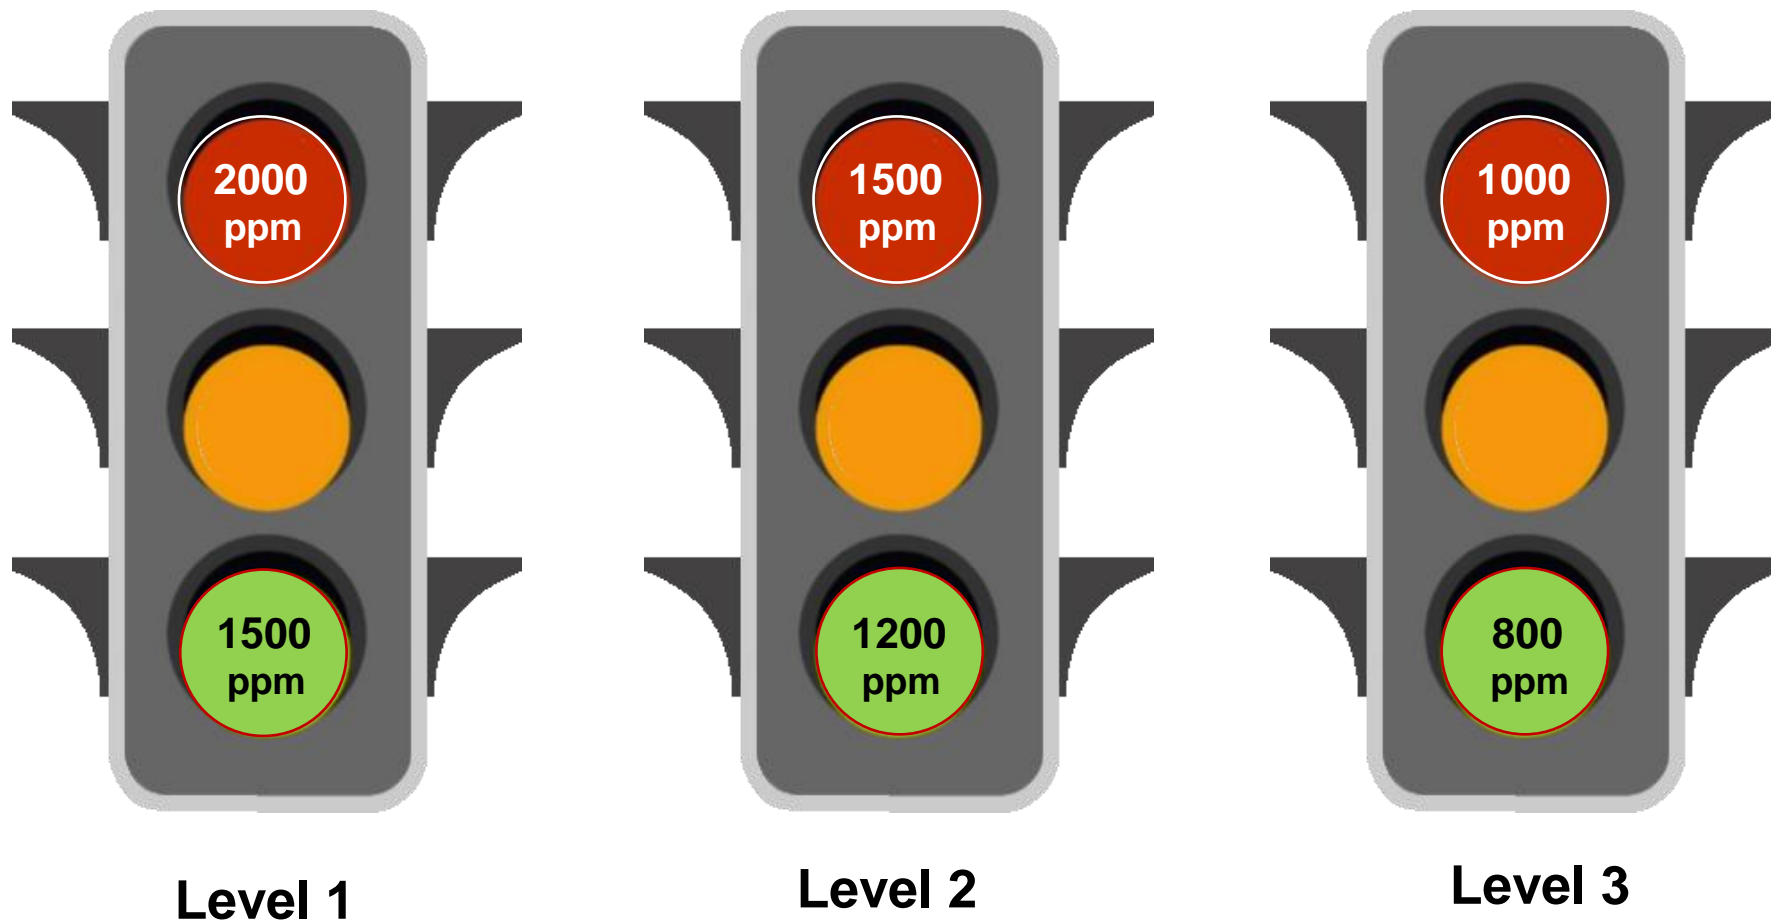

Into Settings -> Enable CO2 Ampel' s Bluetooth and Photos permission.

Photos : The screenshot feature in the CO2 Ampel app will work when permission to photo is granted.

Bluetooth : The Bluetooth's scan function will work when permission to Bluetooth is granted and mobile's Bluetooth is enabled.

Epidemic Warning Standards

EWS-Level CO₂ limit

Index for Air Quality(IAQ) classification and color-coding

IAQ Index	Air Quality	Impact (long-term exposure)	Suggested action
> 200	Severely polluted	More severe health issue possible if harmful VOC present	Contamination should be identified if level is reached even w/o presence of people; maximize ventilation & reduce attendance
101 – 200	Moderately polluted	More significant irritation possible	Increase ventilation with clean air
0 – 100	Good	Pure air; best for well-being	No measures needed

WBGT

classification and color-coding

WBGT	Level	Impact
$> 40\text{ }^{\circ}\text{C}$	Danger	May cause muscle cramps, heat exhaustion ; Prolonged exposure to the sun or intense activity can lead to heat stroke.
$32\sim 40\text{ }^{\circ}\text{C}$	Caution	Prolonged exposure to the sun or intense activity can lead to heat stroke.
$12\sim 32\text{ }^{\circ}\text{C}$	Safe	None
$10\sim 12\text{ }^{\circ}\text{C}$	Caution	May cause non-freezing cold injury.
$\leq 10\text{ }^{\circ}\text{C}$	Danger	May cause non-freezing cold injury ; May cause frostbite or chilblains.
